DETAILED ACTION

This is the first office action for U.S. Application 10/809,404 for an Adjustable Support Foot filed by Shih-Yi Huang on March 26, 2004.

Allowable Subject Matter

Claims 1-10 are allowed. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an adjustable support foot with the following: A support post having a base and a screwed axle erected thereon; a plurality of retaining plates each provided with a screw thread on an inner wall thereof, a rim of an upper end of each of said retaining plates being provided with a tapered surface; a control device including a retaining cylinder, a control ring, a spring, an axial actuator and a radial actuator; whereby the retaining cylinder is a hollow cylindrical body provided with a lower receptacle hole and an upper axial hole, a top end of the receptacle hole being connected to the axial hole through a tapered section, a wall of the retaining cylinder surrounding the receptacle hole being provided with a plurality of inwardly tapered through holes each for housing a steel ball; the control ring being a ring body enclosing the retaining cylinder; an inner wall having a plurality of slots; the spring coaxially situating in an upper portion of the retaining cylinder and constantly pushing the control ring downward; the axial actuator being connected to the retaining plates for pulling the retaining plates outward by an elastic means thereof; an outer shell being a hollow body shell body enclosing the control device, the outer shell having two axial holes each on a top surface and a bottom surface thereof, the bottom axial hole

Art Unit: 3632

further including an upwardly tapered section; whereby at least two retaining plates are used to engage the screwed axle of the support post and then housed in the receptacle hole of the retaining cylinder, the retaining plates being secured within the retaining cylinder by engaging the upper tapered surfaces of the retaining plates with the tapered section of the outer shell, the axial actuator and the radial actuator capable of being controlled from the outside for quickly adjusting the heights of the adjustable support foot.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
